End Application:

F100-pw-229 aircraft engine

Nominalheight:

6.500 inches

Nominaldiameter:

39.000 inches

Special Features:

Steel, aisi 1018; welded construction

Functional Description:

Required to align the bosses during installation into the low pressure turbine case

Reference Data And Literature:

Pw serd no. 6163

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
