

View Online at <https://aerobasegroup.com/nsn/4920-01-389-3482>

Special Features:

Consists of model 2705 ac voltage standard; model 2703 ac voltage standard; model 620a resistance calibrator; model 2701c dc vol/current standard; mod 8840a dmm; ieee 488 interface connector; power distribution panels; operator display monitor; cammac card cage assembly.; model 2555a ac/dc current standard; process data display monitor; computer; ac load system; printer; computer terminals

Functional Description:

Bused to calibrate the calibration set; secondary reference standards (cal cart) and pump unit, test statio (low pressure pump module) ; calibration set is then used to calibrate the test stations

Reference Data And Literature:

Serd 1004

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A537k0
