End Application:

C-130 aircraft ads right hand rail

Product Name:

Tester, latch

Special Features:

BATT-ER-Y;A-RACH

Functional Description:

Zused to provide maintenance and operations personnel more reliability anaccuracy when testing the p/n 14711-200 rh detent latch assembly. Of the a/a32h-4a cargo handling system; measures a force of 500 to 4000 lbs; for on aircraft calibration

Reference Data And Literature:

Serd 15-92-0010; tech order=operation & maintenance instruction w/ipb-electronic latch tester

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A23800
