End Application:

C-17 aircraft engine f117-pw-100

Nominalheight:

12.000 inches

Nominaldiameter:

52.500 inches

Special Features:

Fixture, machining

Functional Description:

Fixture is required to hold the 1st stage compressor stator assembly for the machining of the inner seal ring and outer rub strip

Unpackaged Unit Weight:

720.000 pounds

Reference Data And Literature:

Serd no.1478

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
