End Application:

C-17 aircraft engine f117-pw-100

Nominalheight:

5.000 inches

Nominaldiameter:

56.500 inches

Special Features:

Unapproved item name; fixture, machining.Consists of steel ring, 12 strapclamps

Functional Description:

Fixture supports the intermediatecase in the rear end down position andis used to machine the front face and diameter before and after plasma spray

Reference Data And Literature:

Serd no. 1409

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
