C-17 acft; f117-pw-100 eng

## **Special Features:**

Consists of a steel constructed circular cavity that locates and supports the rings; two larger arc cavities that locate and support the clevises; eight clamps for securing the engine parts to the fixture; four through holes that mount the fixture to the work station

## **Functional Description:**

Used to locate and support the rings and clevises during the repair of the bushings in the hpc inlet syncronizing ring assembly

## **Reference Data And Literature:**

Serd 2014

Shelf Life:

N/a

**Unit Of Measure:** 

--

**Demilitarization:** 

No

Fiig:

A505c0
