End Application:

F-16 acft

Inclosure Feature:

Multiple item w/housing

Test Type For Which Designed:

Gac sst

Special Features:

Gac subsystem tester. Consists of digital/analog monitor and control, muxmonitor and control, and computer monitor and control

Functional Description:

Provides the capability of downloading an ofp into the gac's memory and testing of the ofp's capabilities in a simulated flight environment

Reference Data And Literature:

A.F. Form 601

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-a
