Width:

19.000 inches

Length:

63.000 inches

Inclosure Feature:

Multiple item w/housing

Test Type For Which Designed:

Measuring/evaluating electrical video; syncro signals

Special Features:

Test set, avionics

Functional Description:

Capable of fault isolating all malfunctions of plug-in subassembly level, when it is feasible within the subsystem; duplicate problem that was indicated in aircraft to prove there was actually a malfunction within the lru and not in the interface wiring; perform functional verification tests of repaired lru's and any units received from the supply system

Height:

22.000 inches

Reference Data And Literature:

Serd: 0100

Fsc Application Data:

Asn-161 s.E.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-a
