End Application:

C-17 aircraft engine f117-pw-100

Nominalheight:

7.700 inches

Nominaldiameter:

16.000 inches

Special Features:

Known as machining fixture-low pressure turbine hub, inr locating rib, rearface and inr locating snap diameter

Functional Description:

Used to support the low pressure turbine hub during various machining repairs

Reference Data And Literature:

Serd no. 1128

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
