End Application:

C-17 aircraft engine f117-pw-100

Nominallength:

55.000 inches

Nominalheight:

12.000 inches

Nominaldiameter:

32.000 inches

Special Features:

Fixture, machining - combustion chamber lug holes and igniter tube; c/o circular steel base having eight upright supports weled to base. Six supports are evenly spaced with removable bushings at the outer ends and fixed bushings at the inner. The remaining two supports are higher than other six and are angled outward to align with the igniter guides

Functional Description:

Used to support combustor outer liner for machining new or repaired mount lugs and for machining the liner to accept new igniter guides

Unpackaged Unit Weight:

370.000 pounds

Reference Data And Literature:

Serd: 0149; rcn: 9-0032-006-2050

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
