End Application:

C-17 aircraft engine f117-pw-100

Nominalheight:

4.000 inches

Nominaldiameter:

25.500 inches

Special Features:

Fixture, machining. Consists of steel base with eight steel welded blocks one aluminum ring clamp, twelve (12) adjustable titanium clamps, and two (2) diamond pins

Functional Description:

Used to support both halves of the 8th stage inner shroud segment assemblies during machining of the trunion

Unpackaged Unit Weight:

135.000 pounds

Reference Data And Literature:

Serd no. 1400

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
