Overall Length:

37.000 inches

Overall Height:

13.000 inches

Overall Width:

22.000 inches

Major Components:

Hydraulic control unit, hoses and fittings, one case for each

End Application:

B-2 acft, nha eiad actuator

Component Quantity:

9

Mounting Configuration:

Hydraulic supply and return line from hydraulic pumping unit, two pressure lines, one return line, one jumper line for actuator

Product Name:

Aircraft maintenance test set

Special Features:

Pacer special, used with portable hydraulic test set b0675 or b0676

Reference Data And Literature:

Serd 1641

Specification Data:

C+204000 manufacturers specification

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T01200
