End Application:

C-17 acft

Product Name:

Test set, position indication, engine fan and core thrust reverser

Special Features:

Consists of self test provisions; self contained in a portable case; instrument panel assembly; electrical cable assembly; operates from 115+/-12 vac; 47 to 420 hz electrical power; develops a 6.0 +/-3 3 hz proximity sensor excitation signal; approx. Size 20.00 in. Lg; 8.000 in. W; 15.000 in. Ht. (case); 20.00 ft. Length cables; wt. Approx 45 lbs

Functional Description:

Used to check the function of the proximity sensors during functional test and rigging task of the thrust reversers

Reference Data And Literature:

To 1c-17a-4-4; serd 230537

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
