**Major Components:**

Switching, electronic circuits, test points, and interconnections

**End Application:**

Ac-130u gunship

**Component Quantity:**

1

**Special Features:**

Means of holding the cca during testing; requires that load circuits interface the cca to dc power and standard bench test equipment

**Functional Description:**

Used to test the gyro preamplifier circuit card assembly

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

T01200
