End Application:
F117-pw-100 aircraft engine
Nominalheight:
4.100 inches
Nominaldiameter:
9.500 inches
Functional Description:
Is required to hold the bearing housing in the proper angular attitude while machining the bore of the housing during repair
Reference Data And Literature:
Serd no. 1308
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A505c0
