End Application:

C-17 acft

Nominal length:

80.000 inches

Nominal width:

90.000 inches

Nominal height:

110.000 inches

Special Features:

Stand rigging, and testing, fan thrust reverser duct

Functional Description:

Provides support interfaces for the fan thrust reverser ducts during rigging and testing tasks. The fixture consists of a square base with a vertical support frame to hold the duct halves. At the top of the frame the stand has the identical geometry of an aircraft pylon section

Unpackaged Unit Weight:

900.000 pounds

Reference Data And Literature:

To 1c-17a-4-4; serd 230250

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A505c0
