Aircraft Engine Maintenance Machining Fixture - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/4920-01-397-0455

End Application:
F117-pw-100 aircraft engine
Nominalheight:
4.000 inches
Nominaldiameter:
27.000 inches
Functional Description:
Is required to hold the two halves of the ninth stage high pressure compressor shroud during machining repair operations
Reference Data And Literature:
Serd no. 1463
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
Fiig:
A505c0
