Nominal length:

64.000 inches

Nominal width:

74.000 inches

Nominal height:

86.000 inches

Special Features:

Fueslage station 93.0 bulkhead mod fixture

Functional Description:

Used to align the si (6)each radome pins, and fitting locations.Provides for the location of four(4)each support beams(7406-38405), and one(1)each tee(7406-38401), for accurate reassembly and locating the platform and shelf assembly(7406-38300) , and shelf assemblnd the flir fitting installation

Unpackaged Unit Weight:

929.000 pounds

Reference Data And Literature:

Serd no.5111

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A505c0
