**End Application:**

F117-pw-100 aircraft engine

**Special Features:**

C/o two pieces 3.000 in. Dia., 12.000 in. L.; and 8.000 in. Dia., 12.000 in. L

**Functional Description:**

Required to locate and secure the low pressure compressor turbine drive shaft during pre and finish machining of various pilot diameters.

This locator is used to center shaft rear end

**Reference Data And Literature:**

Serd no. 1491

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A23800
