End Application:

4920-01-310-2882

Nominallength:

4.000 inches

Nominaldiameter:

0.625 inches

Special Features:

Steel, 4140-4142 rockwell hardness 38-42; collet chuck extension

Functional Description:

Used to machin aft lug surface, drill and ream i.D. Hole of the center clevis divergent flap

Reference Data And Literature:

Ge drawing no. 3c3851

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
