Overall Length:

9.500 inches

Overall Height:

5.500 inches

Overall Width:

18.500 inches

End Application:

F-16 avionics

Test Item Connection Method:

Cable

Special Features:

Adapter, interface test - combined interrogator transponder. Flex circuit cables with pcb connectors at one end and front panel moiunt cables connections ot the other

Functional Description:

Provides electrical and mechanical interface between the improved avionics intermediate shop (iais) test station ita interface unit and the lru test cable assemblies

Reference Data And Literature:

Serd no.0011

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A537k0
