**Overall Length:**

9.500 inches

**Overall Height:**

5.500 inches

**Overall Width:**

18.500 inches

**End Application:**

F-16 avionics

**Test Item Connection Method:**

Cable

**Special Features:**

Adapter, interface test - combined interrogator transponder. Flex circuit cables with pcb connectors at one end and front panel moiunt cables connections of the other

**Functional Description:**

Provides electrical and mechanical interface between the improved avionics intermediate shop (iais) test station ita interface unit and the lru test cable assemblies

**Reference Data And Literature:**

Serd no.0011

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A537k0
