End Application:

F16 c/d taiwan radio frequency amplifier p/n 1003002g-1

Functional Description:

Submitted name adapter, interfacetest-aiff bfn; used with test staion serd 90784; to include ita interface panel to provide electrical and mechanical interface, cable assemblies, rf boxwhich provides rf interface between the Iru and the iais microwave stimulus unit and microwave measurement unit; additionally weight less any cables will not exceed 45 pounds, dimensions shall not exceed 9.5 x 18.5 x 5.5 inches, shall incorporate identification wordsthat will allow the test program to check that the correct ita is connected, minimize active components but active components will be incorporated as necessary, test programs will be written in f-16 atlas high order language documented in the sts; associated equipme nt - iais test station serd 90784 and iais rf accessory kit serd 90e03; container ita storage case serd 90e07
