Major Components:

Coax switch 3; sliding lock post 2; reference oscillator 2; rf switch 2; ejectors 2; front plate assembly 1; terminator 50 ohm 1; adapter right angle 1; rear plate assembly 1; dir. Coupler 2; power divider 2; inductor, 1mh 1; capacitor 2

End Application:

F-16 generic automatic test station (gats)

Component Quantity:

32

Criticality Code Justification:

Feat

Special Features:

Electro sensitive device

Functional Description:

Used for checking onboard aircraft an/apg-68 radar system; mfg. Name: reference source module a3 rf source panel assembly

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T01200
