Major Components:

Sliding lockpost 2; connector 3; board assembly, ref. Osc a1 1; cover bottom 1; cover top 1; housing 1

End Application:

F-16 generic automatic test station (gats)

Component Quantity:

9

Criticality Code Justification:

Feat

Special Features:

Item is electro sensitive device

Functional Description:

Used for onboard aircraft checking of the an/apg-68 radar system; mfg. Name: reference oscillator assembly reference source module a3

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T01200
