Major Components:

Connector 3; isolator 2; cable assembly 1; adapter, rt angle 1; multiplier asseblly times six 1; board assembly times forty-eight 1; plug 3; cover assembly 1; housing 1; emi filter 1; miscellaneous hardware

End Application:

F-16 generic automatic test station (gats)

Component Quantity:

21

Criticality Code Justification:

Feat

Special Features:

Electro sensitive device

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T01200
