End Application:

F117-pw-100

Nominal length:

40.000 inches

Nominal width:

40.000 inches

Nominal height:

43.000 inches

Special Features:

Periodic inspection of fixture is recommended every si (6) months. Fixture, inspection - combustion chamber

Functional Description:

Locates and supports the combustion chamber for various inspection tasks. Steel tubular weldment stand with a circular steel top support plate, to which si (6) upright supports are secure

Unpackaged Unit Weight:

300.000 pounds

Reference Data And Literature:

Serd no.2545

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A505c0
