Current Type:

Dc

End Application:

Lantirn

Shaft Rotation Direction:

Clockwise

Drive Type:

Friction

Duty Cycle:

Adjustable

Current Rating In Amps:

3.5 and 7.0

Product Name:

Module, electronic, drive

Voltage In Volts:

24.0 and 60.0

Special Features:

Provide compact, high performancesolutions to stepping motor drive requirements; divides each full stp into 10 microsteps, providing 2000 steps perrevolution from standard 1.8 degree stepping motors; high speed bipolar chopper output stages, capable of running stepping motors at speeds in excess of150 revolutions per second; rull compensation for mid-range resonance

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A30500
