End Application:

F117-pw-100

Nominal length:

3.600 inches

Nominal width:

2.500 inches

Nominal height:

2.900 inches

Special Features:

Fixture required to contain shim stock during brazing process while repairing feather seal groove.

Functional Description:

Fixture, braze-high pressure compressor 12th stage stator segment assembly.

Reference Data And Literature:

Serd no. 1953

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
