End Application:

F117-pw-100

Nominal length:

11.000 inches

Nominal width:

6.000 inches

Nominal height:

5.000 inches

Special Features:

Required to hold compressor stator lever during bolt hole repair machining operation.

Functional Description:

Fixture, holding- compressor stator lever

Reference Data And Literature:

Serd no. 1918

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
