**Overall Length:**

18.000 inches

**Overall Height:**

14.000 inches

**Overall Width:**

10.000 inches

**End Application:**

F100-pw-100/200/220/220e/229 engine assembly turbofan

**Product Name:**

Controller, heater, aircraft engine maintenance

**Special Features:**

40LB-SW-EIG-HT;T

**Functional Description:**

Used to provide electrical power and thermostatic control for resistance heaters used during assembly/disassembly operations; provides on/off control of heating

**Reference Data And Literature:**

Serd no. 7368

**General Description:**

C/o this phenolic cabinet containing a thermostatic controller & a power contactor, with supply & outlet cables

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No
