Overall Length:

18.000 inches

Overall Height:

14.000 inches

Overall Width:

10.000 inches

End Application:

F100-pw-100/200/220/220e/229 engine assembly turbofan

Product Name:

Controller, heater, aircraft engine maintenance

Special Features:

40LB-SW-EIG-HT;T

Functional Description:

Used to provide electrical power and thermostatic control for resistance heaters used during assembly/disassembly operations; provides on/off control of heating

Reference Data And Literature:

Serd no. 7368

General Description:

C/o this phenolic cabinet containing a thermostatic controller & a power contactor, with supply & outlet cables

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
