Overall Length:

270.000 inches

Overall Height:

69.000 inches

Overall Width:

87.000 inches

End Application:

C-17 aircraft

Product Name:

Modification kit, engine test

Special Features:

Consist of 4920-01-363-6222, testequipment installation, engine test facility renovation (p/n 900078) & engine test cell air flow equipment installation (cafb engine test acoustical equipment installation (p/n 900079)

Functional Description:

To functionally test the f117/tf33 engines in the quick engine change configuration in a test cell facility following installation of the quick engine change kit and to preform thrust measurement for both engines

Reference Data And Literature:

To 1c-17a-4-4; serd 230258

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
