End Application:

F100-pw-220/229/220e engine

Special Features:

Consists of a fixture, which has an aluminum base with uprights; bearing slides; clevises; actuator; valves; tubing; three manifold blocks; and hoses of various lengths; sizes and fittings; manufactures name: ita nr. 8; item used with fuel control test station, p/n pwa53114-3

Functional Description:

Used as a interface between the compressor inlet variable vanes (civv's); rear compressor variable vanes (rcvvs); and compressor bleed actuators, and the test station during maintenance of the actuators

Reference Data And Literature:

Serd 7799

Supplementary Features:

Company item name-interface test adapter no. 8 actuators (civv primary civv slave, rcvv) fc test station

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
