End Application:

Supports repair of p/n 1276m42g02, nsn 2840-01-146-9445, blade, stage 2, engine f101-ge-102

Nominal length:

19.000 inches

Nominal width:

8.200 inches

Nominal height:

9.000 inches

Special Features:

Serd item name=fixture, machining, shroud interlock-concave, stage 2

Functional Description:

Fixture is used to hold and position the fan blade so that accurate machining can be performed. Will clamp blade dovetail at one end and the airfoil wear tip shroud end to restrain blade to configuration and position for machining on concave side

Unpackaged Unit Weight:

82.000 pounds

Reference Data And Literature:

Contract f33657-95-c-0055, serd 6091; 2j-f101-3-06 wp 047 00

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
