Ac Voltage Rating:

120.0 volts

Frequency Rating:

60.0 hertz

End Application:

Specialized ground servicing equipment; multi-aircraft applicability

Electrical Power Source Relationship:

Operating

Inclosure Feature:

Single item w/carrying case

Test Type For Which Designed:

Boresight verifications of the heads-up display and inertial reference unit

Operating Test Capability:

The abe will meet the following specifications range: +/- 10.0 minutes for all three axes, accuracy +/- 0.86 minutes for all three axes

Phase:

Single

Special Features:

5the aircraft boresight unit c/o reference unit, measurement unit, handheld display unit, system controller, interface cable assemblys in two cases 28"l x 32"w x 24"h ea, total weight 214 lbs, finish-olive drab, design: mil-t-28800d, class 2 modified

Reference Data And Literature:

Air force serd 570769/a

Supplementary Features:

Aircraft elect power supplied to the abe system through a 30 ft power cable with wc596/13-3 or equivalent mating plug

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T228-a
