Major Components:

Reference platforms, hud boresight tool, digital electronic angel sensors 3 pair tied to a central read out controller

End Application:

C-17 aircraft

Component Quantity:

6

Special Features:

Serd name is precision angle measurement system

Functional Description:

Used to establish pitch and roll values by comparing two fixed references to a remote reference; provides the capability to measure hud pitch and roll error

Reference Data And Literature:

Serd no. 570752

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T01200
