End Application:

Mc-130h aircraft

Nominallength:

6.000 feet

Product Name:

Duct alignment fixture

Nominalwidth:

0.500 feet

Nominalheight:

1.000 inches

Special Features:

Fixture is used in conjunction with the radome assembly fixture to locate and position the anti-icing ducts to the radome manifolds during replacement of the ducts; made of aluminum; 55lbs

Functional Description:

Required for positioning the antiicing duct during replacement

Reference Data And Literature:

Serd no. 6140; to 35d8-7-4-1

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A505c0
