Major Components:

Test adapter 1, discharge lead 1, discharge sensor 1, ignition end cap 1

End Application:

C-17 aircraft

Component Quantity:

4

Special Features:

Serd name was kit, test, ignition system tester

Functional Description:

Used to measure the exciter spark and stored energy; this item adapts to the ignition test set

Reference Data And Literature:

Serd no. 23p107

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T01200
