**End Application:**

F100-pw-229 eng age

**Nominallength:**

4.100 inches

**Nominalwidth:**

5.000 inches

**Nominalheight:**

2.000 inches

**Special Features:**

Estainless steel/aluminum; c/o a holder assembly having 6 central powder ports with tackwelded tubular stops. The center of the holder contains a through hole for a commercial flame nozzle. 3 through holes are spaced between powder ports to hold special blow-off tubes for flame nozzle protection from excessive plasma build-up; 4 alum blocks retained to the holder assembly by retention screws support commercial cross jet cooling adapters providing periphery cooling

**Functional Description:**

Required to position and hold commercial and special applicators in a controlled pattern during pwa284 abrasable coating repair. Adapter holds a flame nozzle, metering powder ports, protective flame holder blow-off tubes, and periphery cooling tubes. Typical repair: 7th stage compressor stator segments

**Reference Data And Literature:**

Serd no. 7019

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No
