End Application:

F101-ge-102

Special Features:

Manufacturer's suggested name is fixture, machining-hpt (high pressure turbine) aircraft shaft

Functional Description:

Used to accurately support the shaft concentric and square to the machine table during machining operations

Reference Data And Literature:

Serd no. 6100

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
