End Application:

F101-ge-102

Special Features:

Manufacturer's suggested name is fixture, machine - lp (low pressure) turbine rotor disk stage 1

Functional Description:

Required to rigidly support the disk concentric and flat for the machining operations

Reference Data And Literature:

Serd no. 6165

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
