End Application:

Avionics support equipment

Functional Description:

This test set is required to enhance fault isolation of the yaw damper system. If a failure is attributed to a system other than yaw damper system to the wra, the test procedure will indicate to the operator when yds failures are attributable to other aircraft systems so that additional testing may be performed

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

T228-a
