**Overall Length:**

29.000 inches

**Overall Height:**

10.000 inches

**Overall Width:**

20.000 inches

**Ac Voltage Rating:**

115.0 volts

**Frequency Rating:**

60.0 hertz

**End Application:**

Ac-130u aircraft trainable gunmount assembly sensors

**Adjustment Method:**

Toggle switch

**Test Item Connection Method:**

Cable

**Special Features:**

Provides ability to test/monitor by inserting into aircraft wiring. Multimeter (included) or oscilloscope measures signals by inserting probes into switch controlled jacks. Leds provide indication of sensors. Internal power supply provides positive 5 and 15vdc

**Reference Data And Literature:**

Serd 0583

**Supplementary Features:**

Set includes 4 interface cable assemblies and a hand held digital multimeter/oscilloscope (fluke model flk-123/003)

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A537k0
