End Application:

F100-pw-229 turbine engine

Product Name:

Fixture, constraint 2nd stage turbine disk, rear

Nominalheight:

7.000 inches

Nominaldiameter:

28.500 inches

Special Features:

Requested name-fixture, constraint-2nd stage turbine disk, rear

Functional Description:

Used to constrain the turbine disk for inspection of the rear snap dia

Reference Data And Literature:

Serd number8593; t.O. 2j-f100-53-8

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
