End Application:

C-17

Nominal length:

36.000 inches

Nominal width:

24.000 inches

Nominal height:

18.000 inches

Special Features:

Company name is set, sensor-inclinometer alignment/material: electronic components; finish: best commercial practice; operating temperature -40 degrees to + 125 degrees f; non-operating temperature -65 to + 160 degrees f

Functional Description:

To measure and verify hud and instrument tray pitch and roll alignment with the aircraft

Unpackaged Unit Weight:

30.000 pounds

Reference Data And Literature:

Serial number 570768

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A505c0
