End Application:

F100-pw-229 eng

Nominal length:

2.000 inches

Nominal width:

2.000 inches

Nominal height:

3.000 inches

Special Features:

Orig dwg name-fixture, weld-8th stage stator, featherseal repair

Functional Description:

When puddle welding fixture locates and clamps stator segment adjacent to airfoil section and dissipates weld heat from airfoils. The copper body is water cooled, tubes are brazed to the body

Reference Data And Literature:

Serd 8811

Shelf Life:

N/a
