End Application:

F100-pw-229 aircraft engine

Nominalheight:

9.500 inches

Nominaldiameter:

22.000 inches

Special Features:

Company item name-fixture, polish-2nd stage turbine disk

Functional Description:

Used to position and hold 2nd stage turbine disk p/n 4077902 on pwa71991 rotating or pwa71990 reciprocating polish machines

Unpackaged Unit Weight:

111.000 pounds

Reference Data And Literature:

Serd no. 8505

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505c0
