End Application:

F100-pw-220/220e

Unpackaged Unit Height:

4.000 inches

Special Features:

Circular steel base, 20 in. Dia

Functional Description:

Used to position and hold rear compressor inlet air seal p/n 4067069 to restore front flange surfaces for eddy current inspection

Reference Data And Literature:

Serd no. 8639

Supplementary Features:

Company item name-fixture polish compressor air seal, 9-11 stages

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
