**End Application:**

F100-pw229

**Nominal length:**

38.000 inches

**Nominal width:**

38.000 inches

**Nominal height:**

3.500 inches

**Special Features:**

Consists of a sizing ring, material ra 330, which has an expansion ration greater than the part material, for restoring the part round after welding; also a ring to be placed on top of the synchronizing ring to restore part to reqd flatness

**Functional Description:**

Used to stress relieve of lever arm rivet holes after welding

**Reference Data And Literature:**

8646

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A505c0
